

Digital Accessibility Testing Services

A KPMG Service for G-Cloud 15

Service Definition

Service Description:

Digital accessibility ensures that everyone has access to technology services. This is increasingly important in today's tech-enabled world, where we all use (and rely on) digital services to live our everyday lives. We all want to do the right thing, and organisations are bound by the Public Sector Digital Accessibility Regulation 2018, which mandates that all public facing digital services need to conform to WCAG 2.2 at Level AA, and GDS monitor services on a regular basis.

KPMG's Digital Accessibility Testing Services cover a range of propositions that can be tailored to your needs. We can manage and execute all of your digital accessibility testing across your portfolio, we can carry out formal independent assessments of systems to confirm conformance to WCAG, and we help you to grow your own digital accessibility testing capability.

Whether you are looking for a quick assessment, or needing an independent formal test, or wanting to undertake a strategic programme to develop your digital accessibility approach, our experienced and qualified team can help you to be successful.

Benefits of our services:

- Build a stronger digital accessibility capability in your organisation
- Ensure that your digital solutions are accessible
- Allows you to demonstrate compliance to legal and regulatory obligations
- Independent assessment of conformity to digital accessibility standards (such as the Web Content Accessibility Guidelines, WCAG)
- Independent testing and assurance to build confidence with stakeholders
- Reduce risk of regulatory non-compliance and lost business
- Supports your Environment, Social and Governance (ESG) credentials and reporting
- Promoting digital accessibility allows you to show you are 'doing the right thing' for your users and your own staff
- KPMG specialist teams such as our Legal and Regulatory compliance teams can help clients to understand their risk exposure and adherence to standards and regulations

Features of our services:

We have a variety of service offerings:

- **Accessibility Health Check** – a quick spot-check of a system to identify any key risks and opportunities
- **Automated Testing** – evaluation and application of tools to verify adherence to standards and requirements
- **Manual Testing** – testing user experience and more complex features, including testing with Assistive Technology
- **Accessibility Conformance Testing** – to confirm adherence to standards such as WCAG v2.2 Level AA
- **Ongoing Accessibility Testing** – a retainer service, monitoring accessibility and providing regular assessments
- **Digital Accessibility Capability Development** – working with you to establish (or grow) your accessibility testing capability
- **Training** – develop and deploy training content to promote digital accessibility testing at various levels, focussing on testing tools and techniques
