

Evidence-backed AWS Landing zone

A KPMG Service for G-Cloud 15

KPMG About us

KPMG is one of the largest AI Platforms & Cloud Engineering Advisory and Implementation providers in the UK. We bring end-to-end services across the entire cloud life-cycle from Strategy and Planning, to Architecture and Build, through to running Secure cloud-native applications. This is enabled by our diverse, industry-leading and multi-disciplined experts.

 AI Platforms & Cloud Engineering in its 10th year	 1000+ AI Platforms & Cloud Engineering Team (670+ Engineers & Architects, 500+ Advisory & Delivery consultants)	 2000+ AI & Cloud certifications in Azure, Google, AWS	 £30M + AI Platforms & Cloud Engineering spend supported annually	 600+ AI Platforms & Cloud Engineering projects completed	 50%+ Focused on highly regulated industries
--	---	---	--	--	---

AI Platforms & Cloud Engineering Practice

- Deep domain experience across a wide range of Cloud providers and technologies
- Leading and award-winning scaled engineering capability
- Long established consulting approach and methodologies

Our Principles

- Industrialised approach reusing assets and accelerators
- Automate everything
- Deliver value for money
- Pride ourselves on high quality outcome deliverables

How we Operate

- Sprint based projects for fast iterative results
- Delivering with our clients using outcome focused multi-disciplinary teams
- Strong, established network to ensure partnering excellence

Our Core Propositions

Besides the core propositions we deliver **240+** services mentioned in our Service Catalogue

Operational Excellence 	AI Powered Modern Platform 	Modern Engineering 	Value & Sustainability 	AI Powered Application Modernisation 
• Cloud CoE & Target Operating Model • Cloud Programme Risk and Assessment • Cloud Maturity Assessment	• Cloud Design, Build, Migrate & Transform • Cloud Risk Controls & Cyber • Cloud Security Architecture	• DevOps & DevSecOps • Secure SDLC • Site Reliability Engineering (SRE)	• ESG • Cloud Value Management • FinOps • Sustainable Technology	• Gen AI • Cloud Data & Analytics • Logging and Monitoring

Across our many delivery centres, we work with clients of all industries, specialising in complex, high risk or regulated sectors.

Combining our expertise with our alliance tech solutions, we harness the power of smart technologies. Together, we solve your most complex business issues to create sustainable success.

AWS Landing zone

Service Description:

KPMG's evidence-backed AWS Landing Zones are fully automated, pre-configured, secure, and scalable way to standardise AWS cloud infrastructure deployments in a multi-account environment. It offers a baseline for governance and security that helps speed up delivery while ensuring regulatory compliance following operational excellence and security best practices.

Service Categories

- Networking
- Security
- Governance
- Logging and monitoring
- Identity and Access Management
- Storage
- Compute
- Database

What are the benefits of KPMG Powered IT service?

- Simplifies the process of setting up and managing your environment.
- Allows you to scale your infrastructure effectively.
- Helps you improve the security of your AWS environment.
- Helps you meet your compliance requirements based on best practices.
- Helps you reduce costs by automating the deployments.
- Helps you increase your agility by providing a flexible platform.
- Out the box compliance reduces time to market.

Our service features

- Customized consultancy from design, architecture, build and run
- Spanning environment setup to a fully managed service
- Consistency and repeatability across development, test and production
- Following Well Architected Framework and Cyber Essentials+
- Using Infrastructure as Code and Continuous Integration and Delivery Pipelines
- Multi-account AWS environment with least privileges role based access control
- Designed to help you meet your compliance and security requirements
- Total cost of ownership (TCO) optimisation

Our Approach

KPMG proposes a well-defined approach that will assist in delivering a customised solution that meets your requirement. Using our global framework, industry experience and methodologies we will accelerate your journey to cloud, adoption of your operating model structure, creation of a resilient architecture and business case.

Requirements

- Design and implementation of an AWS Landing Zone necessitates a detailed assessment of the organisation's current IT infrastructure, comprehensive understanding of business objectives, and strict adherence to industry compliance standards. This foundational groundwork ensures the designed AWS environment is scalable, secure, and optimised to support enterprise-level operations, including future growth and technological advancements.
- Access to security, network and architecture stakeholders to help define the layout and requirements of the cloud landing zone
- Assessment of required controls and governance for deployment of automated guardrails, controls and alerting

High-Level Timelines

Our indicative timeline is based on our experience of delivering similar engagements for multiple organizations. Once engaged, we will work with you to create and agree a bespoke plan to meet your specified requirements.

Weeks: >4 weeks

Activities

Planning

- Consider the current state and future evolution of client workloads, conduct stakeholder workshops on an initial analysis phase where we gather the requirements for scalability with consistent performance.
- Plan a modular approach across services to give a baseline compliant network architecture, security controls, governance policies, and operational

Design

- Architect a scalable and compliant AWS landing zone solution.
- Define network design, IAM, security, compliance and governance.
- Ensure design meets both current and future requirements

Build

- Using Infrastructure as Code and CI/CD pipelines, ensure the environments are reproducible with all changes logged and auditable.
- Implement scalable, secure, and efficient cloud environments ensuring they are aligned with present business needs and future growth objectives.
- Ensure that there are robust governance policies, access controls and encryption is in place and enable compliance monitoring using a suite of AWS services to immediately flag up issues.

Outcomes

- Fast Time to Market
- Implementing our AWS landing zone effectively streamlines deployment and reduced time to market
- Flexible
- AWS Landing Zone has a modular design allowing elements to be selected and implemented individually or as a whole allowing you the maximum flexibility in what you want from a landing zone
- Compliant
- The AWS Landing Zone will be deployed with industry controls baked in in accordance with your organisations requirements.
- Secure
- AWS Landing Zone is secure by default ensuring best practices such as least privilege and network segregation are implemented by default, configurable to your organisations needs
- Landing Zone as Code
- All configuration and code for the Landing Zone is held in source control and implemented with automated pipelines. These can be configured to have relevant approvals as per your organisation's requirements, and as changes are held in source control the history of updates can be viewed at any time.

Why KPMG

Top Professional Brand

KPMG has a strong brand and excellent reputation. We are focused on customer needs and have a pragmatic approach for the design and delivery of our Projects. Our team has a proven track record of delivering similar engagements and an intimate knowledge of challenges faced by our clients.

Constructive Input and Challenge

We consider it to be our responsibility to bring an independent perspective and constructively challenge existing processes and systems. We will highlight and share with you both internal and external leading practices.

We Employ a Collaborative and Integrated Team Approach

We deliver a full suite of evidence-backed recommendations in collaboration with KPMG sector and technical experts in all parts of our business around the globe. By working in multi-disciplinary teams, we can deliver holistic thinking and insights for even the most complex challenges.

We Have Strong Relevant Recent Credentials

We have worked across multiple industries and will bring insights from other sectors to challenge your thinking. We have vast Cloud and DevOps expertise within our technology practice in the UK region alone, who cover everything from hosting strategies to building landing zones. We produce agile, resilient and efficient IT functions that support the wider enterprise.
