

Data, Analytics and AI Capability Operating Model Design

A KPMG Service for G-Cloud 15

Data, Analytics and AI Capability Operating Model Design

Service Description:

We provide clients across Healthcare, Government and Defence with a data management, analytics and AI target operating model (TOM) design that enables their organisation to be data-driven. The TOM describes the capabilities required, how they map to the organisation, and the people, process, and technology components needed to deliver them.

What are the benefits of our service?

- Enables organisations to be data-driven and make evidence-based decisions
- Creates a critical mass of data expertise in the organisation
- Reduces resource duplication across the organisation
- Reduces technology and data duplication across the organisation
- Enables organisations to take advantage of emerging AI technologies
- Fosters a culture of continuous change and innovation
- Enables data quality improvements through centralised data management
- Provides an exciting career path for the organisation's data talent
- Helps improve compliance with key data legislation
- Reduces the time taken to deliver value from data

Our service features
