

Quantexa Design and Implementation Services

A KPMG Service for G-Cloud 15

Quantexa Design and Implementation Services

Service Description:

Quantexa's Global Partner of the Year 2024, KPMG offer design and implementation services for Quantexa's world-class Decision Intelligence Platform, delivering value and efficiency from siloed data.

Our services include platform configuration and integration supporting fraud and risk analytics, decision intelligence, entity resolution and management, data management, and data linking.

Awards:

Our service features

- Identification of data landscape, business processes, and use cases
- Implementation of the Quantexa platform including configuration and onboarding
- Re-engineering of existing data solutions into Quantexa's platform
- Cloud-independent data flows including low and no-code connectors
- Configuration of decision intelligence and advanced analytical models
- Configuration of custom models using open architecture i.e. Python
- Configuration of segmentation models and next best action workflows
- Configuration of entity resolution functionality and alert capabilities
- Configuration of security and access functionality
- Technology-enabled business process design and workflow / investigation management

Our service features

- High-accuracy entity resolution and investigation capabilities
- Cost effective single platform delivers multiple use cases
- Works with disparate / disconnected architectures and datatypes
- Low-effort data ingestion and linking so faster time to value
- Scalable to billions of records whilst retaining speed
- Accessible end user interface, auditable decision history, and saveable queries
- Inbuilt analytics and visualisation, and connectors for third-party software
- Increased efficiency of operational teams i.e. fraud investigation, due diligence
- Knowledge and skill transfer to empower operational teams
- Programmes designed to accelerate time to value and maximise ROI

Our Approach

Implementation Plan:

We typically deliver these projects in the phases set out below:

Use Case Identification and Assessment: We run workshops with your teams to identify, prioritise, and develop use cases for your organisation, focusing particularly on value for money and time to value.

Customisable implementation plan: We'll create customisable implementation plans around your Quantexa use case(s). We take into account common data challenges such as data quality, data accessibility, and slow adoption, to get ahead of barriers and set the project up for success.

Deliver technical infrastructure: We will set up the necessary technical infrastructure, including securely connecting to source systems and datasets to quickly deliver value from your Quantexa deployment. We can configure data flows in both batch and on-demand modes, and implement advanced technologies in Quantexa like Graph Scripting DSL and Assess Framework.

Agile test strategy and assurance framework: An agile test strategy will keep pace with rapid product development. Creating a test assurance framework which includes automation and test optimisation ensures high quality, efficient testing.

Onboarding and offboarding support:

Onboarding

- We'll rapidly deploy high performing teams from our extensive resource pool across KPMG and partners
- Production of high quality cross-programme and team-specific onboarding packs
- Definition of collective roles and responsibilities including that for outputs
- Proactive management to address risks before they impact.
- Understanding of rainbow teams' skills, enabling targeted training/recruitment to address gaps.
- Execution of a Project kick off event and associated materials to formally launch the project and to aid new joiners in orientation

The migration of client data is often a critical path item on the onboarding plan. We work with our clients to assist them to transition data to Quantexa. As part of this we would provide standard templates and knowledge transfer to allow the client and/or their existing service provider to extract and provide data in the correct format.

Offboarding

We recognise that effective knowledge transfer needs to happen in several ways. We offer a range of channels for learning and will select and design the most appropriate ones for Quantexa with you and we're ready to adapt these channels for this programme. Typically this includes creation of content such as:

- Training videos
- Adoption playbooks
- Nudge communication campaigns
- Webinars
- Classroom sessions.

By working closely with your digital, data, and technology teams, we maintain a continuous knowledge transfer process that also upskills your teams in Quantexa infrastructure throughout the project.

Why KPMG

KPMG x Quantexa:

KPMG have a world-class global Quantexa delivery practice. We won their Global Partner of the Year award for 2024 having previously won the Quantexa Innovation Partner of the Year award in 2023. These awards are a direct result of our delivery of innovative and effective solutions and services, as well as our close collaboration with Quantexa to ensure our offerings seamlessly integrate with both Quantexa's and our client's systems.

We are a Quantexa Platinum Partner, which is the highest level of partnership available. This reflects our deep understanding of the Quantexa platform and Quantexa's complete trust in our ability to deliver successful projects for our clients.

Global scale across all industries
