iplanit

IPLANIT PRICING STRUCTURE

ANNUAL SUBSCRIPTION CHARGE

iplanit pricing is based on an Annual Subscription Charge (ASC) model. These are charged **per Service User, per Annum**.

There are no additional charges for family and friend “invited guest” access, nor are there any limits on the number of provider staff or managers. The ASC has inbuilt volume discounts based on a banded scale linked to the number of people supported.

CONFIGURATION AND IMPLEMENTATION

Aspirico believes in transparency and cost-effectiveness for our clients, and as such we are clear with them as to the project's costs involved, rather than “bundling” these costs into higher subscription charges, which then continue long after the project work has been completed.

Project costs are based on a *per diem* charge for the level of effort required for the configuration of your iplanit Core system and Optional Modules recommended.
