TRANSPUTEC

Cyber Security
Vulnerability Management
as a Service (VMaaS)

What is it?

Powered by Qualys, our vulnerability management service (VMaaS) offers unparalleled protection for your digital assets. From one-off scans to 24/7 monitoring, we provide tailored solutions for your security needs.

Features include:

→ Advanced scanning technology:

We offer hybrid vulnerability management using Qualys' advanced scanner, which provides broad, accurate scanning and continuous threat identification across on-premise, cloud, and mobile environments.

→ Comprehensive asset management:

Our service offers asset discovery, categorisation of vulnerable assets, and ongoing monitoring for new vulnerabilities across all assets.

→ Detailed reporting and insights:

Receive actionable intelligence with custom reports, prioritised vulnerabilities, and actionable recommendations for effective risk mitigation.

→ Expert Analysis and Support:

Benefit from our experienced cybersecurity team's thorough analysis, tailored consulting, and dedicated 24/7 support for robust security strategies.

Why you need it?

One of the main reasons for cyberattacks is that hackers take advantage of known software vulnerabilities and configuration issues.

All modern software and applications have their flaws, and new ones pop up all the time. Cybercriminals, hackers, and even nation-states are always coming up with new ways to exploit these weaknesses to break into corporate networks and steal sensitive data.

To keep these attacks at bay, it's important to constantly check for, prioritise, and fix vulnerabilities. Plus, once a vulnerability is patched, we need to make sure it doesn't come back due to system resets.

Get started today

Protect your digital assets with Transputec's Vulnerability Management Service.

Why us?

Our tailored Vulnerability Management as a services (VMaaS) empower organisations with the tools and expertise needed to stay secure.

Why you need it?

→ Expertise:

Access to a skilled team of cybersecurity professionals.

→ Cutting-edge technology:

Utilisation of advanced assessment tools and Qualys' state-of-the-art scanner.

→ Customisation:

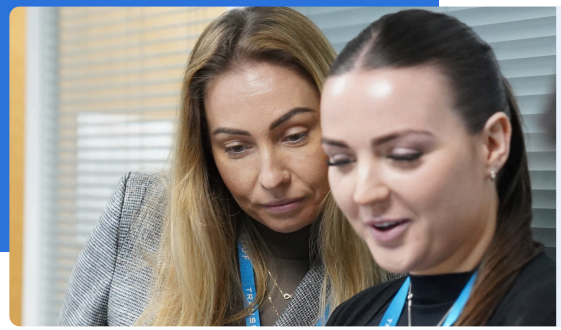
Tailored vulnerability strategies aligned with your specific business objectives.

→ Cost-effective:

Significant savings compared to potential breach costs.

→ Proactive security:

Continuous monitoring and rapid response to emerging threats.



Summary

At Transputec, we recognise that effective protection against such threats requires ongoing assessment, prioritisation, and remediation of vulnerabilities. Our services ensure that once vulnerabilities are patched or resolved, they remain secure, even in cases of system rollbacks or resets. By leveraging advanced tools and our expert analysis, we help safeguard your business from evolving cyber threats.

Our available service tiers

One-Off Scans and Discoveries:

Our one-time vulnerability assessment provides a snapshot of your current security posture. This service includes:

- Thorough system examination to detect potential threats
- Port scanning to identify open ports and running services
- Vulnerability detection against a comprehensive database
- Detailed report with identified vulnerabilities and severity levels
- Actionable recommendations for remediation

Scheduled Monthly or Quarterly Reviews:

Regular scans ensure ongoing protection against evolving threats. This service offers:

- Periodic vulnerability assessments (monthly or quarterly)
- Continuous monitoring and reporting of assets for new vulnerabilities
- Trend analysis to track security improvements over time
- Prioritised remediation recommendations
- Compliance reporting for auditors and stakeholders

24/7 Managed Vulnerability Management Services:

Our round-the-clock service provides constant vigilance and rapid response. Features include:

- Real-time threat detection and analysis
- Assistance with Immediate incident containment to prevent threat spread
- Assistance with In-depth digital forensics for root cause analysis
- Assistance with Swift recovery planning and implementation
- Ongoing security posture strengthening advice

What it costs?

Options	Service Type	Charge Range	Comments
Option 1	One off scan and discovery	£1,350-£1,750	Up to 5,000 assets One off charges indicated
Option 2a Quarterly	Scheduled scans and discovery	£ 625 - £750	Up to 5,000 assets Quarterly charge indicated
Option 2b: Monthly	Scheduled scans and discovery	£475 - £650	Up to 5,000 assets Monthly charge indicated
Option 3	24x7 Managed Vulnerability Management service	£650-£1450*	Up to 5000 assets Monthly charge indicated *Plus one off £475 setup charge
Ad-hoc	Remediation services	£115 per hour	Unless an existing Transputec Managed Service client
PoC	Proof of Concept	Subject to agreement
