1. LAMP Application Software Pricing

All pricing below is shown in £ and as net of VAT.

1.1. System pricing

All LAMP services, whether a single module system or an integrated multi-module system are priced at a per user, per month basis. Note, however, that the starting monthly charge for any system reflects a starting user count of **25 users per month**, irrespective of module content and the number of users.

In addition a new installation carries a **setup charge of £4,750.00** that is levied at contract start (this covers a 'discovery' period of investigation, consultation and briefing, being a minimum of 5 days). All charges are levied on a per month basis and a minimum period for new installations is three months. Additional discovery days can be requested by the customer and will be charged at our standard day rate (£950.00).

1.2. Module Pricing

Modules are sequentially priced to reflect business intensity - the customer initially purchases the CORE module plus, and optionally the Trader module, banded by the appropriate number of users per month.

A system must have minimally a **user count of 25**. Above 25 users, the numbers of users is placed into two bands as indicated.

Prices are given **PER USER** for the following bands:

Module	25 users Per month	26-200 users per month	200+ users per month	Minimum order period (months)
	£	£	£	
Core System (LAMP Time Recording & Projects)	22	15	13	12
LAMP Trader System (includes Core)	25	18	16	12

1.3. Additional services, Consulting and Project Management

Bensasson & Chalmers' team provide a range of supporting services to help users

- Design and Configuration/Setup
- Implementation/Setup
- Business Intelligence/Setup
- Project Management
- Documentation

These services are all priced and charged individually at £1,195 per day. Typically in a project these items of work are will be co-ordinated and Bensasson & Chalmers will bundle the service prices to reflect the associated efficiencies.

As indicated above, for implementation of a new system the setup service will start at 5 days (£4,750.00) which is a minimum standard for new systems. This 'standard discovery' period covers investigation, consultation and briefing and is essentially initial configuration. If multiple components are required then the setup for these are priced at £1,790.00 per additional component. If additional discovery resources are requested by the customer, then this will be charged on a time basis beginning at the rate of £1,1950 per day

1.4. Training

- Standard Training £1,1950.00 per day
- Bespoke Training £1,195.00 per day, plus 1 day set up time
- Remote delivery £150 per hour
- Training videos, for each 5 minutes £1,900.00 (One day discovery and one day of production)

N.B. Bensasson & Chalmers recommends that training is delivered to groups with a maximum participation size of 8 trainees.
