

Abavus - Integration

Product - Integration	Cost	Information
Integration development, where integration has already been completed for another client	£5,000.00 (one-off cost)	We have completed many integrations for local authorities. Where existing integrations are requested, as long as the buyer is happy to accept the integration flow as already built with no changes, this standard one-off cost applies.
Integration development, charged per integration flow, where integration does not currently exist	£8,500.00 per flow	Where integrations are requested that have not previously been completed or are not currently in-situ with another client authority, standard integration flow costs are charged. After the first integration flow, every additional integration flow will be charged with a 7.5% discount, up to a maximum of 30%. For example, 2 flows = 7.5% discount, 3 flows = 15% discount, 4 flows = 22.5% discount, 5 flows = 30% discount
Authorisation Integration (Auth2)	£8,500.00 (one-off cost)	Authorisation and authentication for third party systems.
Active Directory Integration (AzureAD)	£5,000.00 (one-off cost)	To synchronise council staff logins on other systems with their My Council Services account
		In addition to our standard support, we offer an annual enhanced support package for the integrations listed above charged at 20% of the integration cost. This covers resolution of issues originating from the third party integration provider's side. This includes but is not restricted to bug fixes, upgrade configuration, and downtimes. The enhanced support package is optional. Should clients not opt for the enhanced support package, integrations will be covered by our standard support protocols. Resolution of issues originating from the third party's side will be deemed as enhanced support charged at our Integration Support consultancy rates. Please refer to our Cloud Services pricing document on Digital Marketplace for further information.
