1 Cost Illustration (Core Application)

Below is a cost illustration for the deployment and operation of Power Framework PPM. This would be for a typical engagement to deliver the first pilot implementation of the tool.

Figures shown below exclude VAT.

Professional Services

This is a sample cost breakdown for deployment services which assumes a limited amount of customisation that stays close to the templated structure of Power Framework PPM.

Service	Basis	Cost
QuickStart Prototype	5 days @ £1280	£6,400
Build Up	23 days @ £1280	£29,440
Roll Out	8 days @ £1280	£10,240
Project Management	9 days @ £975	£8,775
	Total:	£54,855

Solution Service (Annual Recurring)

This is the cost for an all-inclusive annual service to operate Power Framework PPM in single solution environment for up to 50 users, fully supported. Includes your dedicated development environment hosted by us.

Item	Basis	Cost
Power Framework PPM solution (max 50 users)	Year 1	£25,850
Helpdesk services (unlimited calls)		
Environments: Production and Pre-prod		
Development Environment – Your own dev environment will be hosted in our tenant		
	Total:	£25,850

Add-on Modules

The following add-on solution modules are not included in the cost illustration above. They are not part of the standard core application, rather they are selectively added as needed.

Here is a summary of these components and their pricing:

Add-on Modules	Implementation Cost	Annual Cost
Timesheets (per user, based on total volume)	N.A.	£40-£66
Connectors (Each)	£2,560	£2,750
Roadmap Enterprise	N.A.	£5,280
Portfolio Modelling	£2,560	£13,750
Advanced Snapshot Solution	£2,560	£5,280
Paginated Status Reporting	£2,560	£2,750
AI Assistant	£2,560	£5,280
Reports Enterprise License	N.A.	£13,200
Additional Pre-Production Environment	£2,560	£4,180

Definition of 'Users'

Users are defined as follows:

- anyone with access to the "Power Framework PPM" Power App (excluding timesheet users)
- any consumers of Power BI dashboards or reports created through other tools showing data from the solution (only if these reports maintain a connection to the database that allows them to be refreshed - consumers of manually created data extracts to file formats such as PDF or Power Point are not considered to be Users).

Increasing User Numbers

The sample Solution Service cost shown above is for a user count of 50 at a cost of £25,850. This is the price list to increase the user community:

- Up to 100 users: £39,050 p.a.
- Up to 150 users: £50,270 p.a.
- Up to 200 users: £60,830 p.a.
- Above 200 users: tba

Additional Services

Additional services may be procured e.g. to custom-develop features, develop reports or provide training services.

All services will be charged at the following day rate: £1,280

(A project management effort will be added as 25% of consulting effort, charged at a day rate of £975).

2 Microsoft Platform Licenses

The Microsoft cloud licenses below need to be considered, none of these are included above.

(For a detailed Power Platform licensing guide see [here](#).)

Your Microsoft licenses may be procured through us or through your regular license procurement channel. License cost details are not provided below as they would need to be quoted specifically for you by your chosen vendor.

We require our Microsoft partner account to be recorded in your tenant as the [Digital Partner of Record](#) for the Microsoft licenses associated with this solution.

Power Apps

Required by users of the app only (i.e. only those maintaining project data with the tool, typically PMO and project managers).

Power BI

Required by report authors and report consumers (who may already be licensed for Power BI by your organisation for other purposes).

Power Automate

Single user license required for service account.

Azure Services

Are needed to process background jobs such as imports.

Azure SQL

Required if Portfolio Modelling or Advanced Snapshotting features are deployed.

Other

Work management tools that you wish to integrate are also licensed separately.
