1 Pricing

The pricing relates to the provision of the Savant Stock Control (SSC) Service, our cloud-based stock control management system, as part of G-Cloud 15.

All prices are exclusive of VAT.

1.1 Licence Modes

Savant offers three licence modes for SSC, which can be combined to provide a comprehensive end-to-end solution.

- Warehouse – for use in supplier warehouses, includes receiving customer orders, picking & packing, box labelling and delivery.
- Hospital/Laboratory – for use in hospital and laboratory stock rooms for stock delivery and stock issue, stock checks, movement and reporting. Can be used to generated email orders to suppliers.
- Hospital/Laboratory with Warehouse link – as above, but with a direct link to the Warehouse for ordering.

1.2 Implementation Fees

There are initial fees for the implementation of the application, database and server configuration. There is a lower implementation fee for customers joining an existing supplier service (not displayed here).

The implementation fee is £12,836.

1.3 Annual Fees

SSC licences are provided in packs of 6 or 10 concurrent users, across both applications, and are charged annually. There is also an annual fee for hosting. Multiple user packs can be purchased.

	Warehouse	Hospital/Laboratory	Hospital/Laboratory with Warehouse link
Hosting	£8,980	£8,980	£8,980
10 user pack	£4,749	£2,282	£3,562
6 user pack	£2,849	£1,369	£2,137
Email System	£575	£575	£575

1.4 Training

Training is provided by an external provider. Price available on request.

1.5 Consultancy

The day rates for consultancy are given on the SFIA Rate card.
