Finance Secondary	£2,000
Finance MAT Cluster	£2,000
Finance MAT Cluster per Primary	£250
Finance MAT Cluster per Secondary	£500
Offboarding	
Supply of your data	Free of charge ¹⁵

[12] Standard multi-year data migration scope varies according to legacy system and method used. It includes automated data validation and additional manual data checks by Bromcom’s onboarding team to supplement your own data checks.

[13] Self-migration uses the same migration tools as standard migration but does not include the additional manual data validation step performed by Bromcom’s onboarding team.

[14] Finance onboarding includes training.

[15] We provide up to two copies of the data for each offboarding school, with each copy supplied as an SQL backup file. All data requests must be submitted on or before the end of the contract term. Any request for more than two data copies will incur an additional charge of £650 per additional copy.

Primary MIS Extended Customer Success Services	£1,000
Secondary MIS Primary MIS Extended Customer Success Services	£2,000
Finance Extended Customer Success Services	£1,000

^[16] Training costs are shared when multiple schools attend training together, a practice known as clustered training. For pricing, the total number of schools is divided by 6 to determine clusters. Any remaining schools will be priced as part of clusters containing 7. This ensures training is cost-efficient, as schools benefit from sharing the cost of a single training course. Clustering is effective when schools are onboarded within a similar timeframe.

Bromcom

Buy-Back Scheme

Bromcom's Buy Back option allows a contracting authority locked into an existing School or MAT MIS and/or Finance contract (referred to as the pre-existing contract) to benefit from a discount for the overlapping period¹⁹.

To qualify for the discount, the school or MAT with the pre-existing contract must begin using the equivalent Bromcom service (i.e., MIS and/or Finance) as their live solution. The overlapping period used in the discount calculation begins from the day school(s)²⁰ go live with Bromcom services and ends at the conclusion of the pre-existing contract²¹.

The Buy Back discount is implemented as a series of four annual discount credits, with one credit applied each year against the Bromcom G-Cloud annual service charge. This process is contingent upon the contracting authority providing evidence of its previous MIS and/or Finance contract cost and locked-in commitment for the remaining years.

Bromcom will calculate the cost of the previous MIS and/or Finance contract and divide it equally into four segments. Each year of your new Bromcom G-Cloud contract, you will receive one of the four segments as a discount applied to the annual service charges.

If the pre-existing contract for MIS and Finance services is split into two contracts, the total of the pre-existing MIS contract will be applied to the SaaS charges for the Bromcom MIS service, and the total of the pre-existing Finance contract will be applied to the SaaS charges for the Bromcom Finance service. In both instances, there is a total discount ceiling equal to the annual SaaS charge for the replacement Bromcom service.

To maximise the discount, your new Bromcom G-Cloud contract must be extended to the maximum length of four years for a G-Cloud 15 contract. After four years, you will have recouped the costs paid out for your previous contract for the overlapping period.

Alternatively, if the contracting authority is only able to provide evidence of its locked-in commitment, the value of the Bromcom Standard package will be used to calculate the value of the Buy Back discount during the overlapping period.

[19] Up to a maximum of three years.

[20] When dealing with MAT pre-existing contracts, the overlapping period will consider the go-live dates for each school

[21] To be considered for the Buy-Back scheme, the annual charge from the previous contract has a ceiling equal to the annual SaaS charge of the equivalent Bromcom service.
