

Integrity360

your **security** in mind

Fortinet Services

A portfolio of Fortinet powered Managed Security Services

Introduction

At Integrity360, we are proud to offer a comprehensive portfolio of managed services powered by Fortinet, designed to address the evolving security needs of businesses across the globe. Our suite includes professional services (PS) and managed services for over 15 Fortinet solutions and products. These offerings are meticulously crafted to be bundled in a variety of configurations, ensuring a perfect fit for a wide range of use cases and business requirements.

85%

of organisations will have adopted a zero trust network access (ZTNA) approach by 2024, up from 10% in 2021

Our service highlights include

- **Secure Access Service Edge (SASE):** Forti SASE enables seamless, secure remote work through our Work From Anywhere (WFA) campaign, ensuring businesses stay connected and protected.
- **Cyber security mesh architecture:** Utilising the Fortinet Security Fabric, we offer tightly integrated network and security solutions with centralised management, merging network and security for optimal performance.
- **SD-WAN:** Our Fortinet SDWAN solution transitions businesses from traditional MPLS, offering a more secure, efficient alternative for WAN management.
- **Adhoc services:** We also specialise in managed FortiMail for superior email security, among other tailored services.

At Integrity360, we're dedicated to providing advanced, Fortinet-powered security solutions that empower businesses to operate confidently and securely.

What is a Security Fabric?

The Fortinet Security Fabric represents a comprehensive cyber security solution designed specifically to meet the needs of enterprises and small and medium-sized businesses (SMBs) without compromising on performance. It integrates cutting-edge technologies across endpoints, networks, and clouds to offer complete protection. This convergence of networking and security capabilities ensures high-performing connectivity while enabling coordinated, real-time threat detection and policy enforcement across the entire digital landscape.

At the core of the Security Fabric's approach is its integrated and automated nature. By leveraging AI-powered centralised analysis, it closes security gaps and reduces the complexity inherent in managing cyber security.

This integration of technologies ensures cohesive and consistent security across various locations and deployments, simplifying operations.

The Fortinet Security Fabric empowers organisations to realise the benefits of secured digital acceleration by reducing complexity, streamlining operations, and increasing threat detection and response capabilities. Supported by more than 450 third-party technology partners and growing, the Fortinet Security Fabric gives organisations the ability to adopt a wide range of solutions that fit their individual needs now and the flexibility to adjust to their needs in the future.

The challenges addressed

With 69% of boards propelling their organizations towards digital acceleration, the complexity of managing multiple vendors and solutions can significantly hinder efficiency, inflate costs, and complicate processes. This often results in organisations hastily delivering on these accelerated initiatives, only to later grapple with the challenges of securing their environments. This is where Integrity360's managed service comes into play, emphasising the benefits of expertly designed and managed Fortinet-powered solutions.

Gartner®
predicts that

- by 2024, organisations adopting a cyber security mesh architecture will reduce the financial impact of security incidents by an average of

Our managed service isn't just about leveraging Fortinet technology; it's about harnessing our extensive expertise and broad capabilities in managing these solutions to address the core challenges businesses face today. By focusing on the advantages of our service, we aim to alleviate the burdens of inefficient operations, increased costs, and complex processes that come with handling multiple security solutions.

Our aim is to provide a streamlined, secure, and efficient operational framework that allows businesses to thrive in their digital transformation journeys without being bogged down by afterthought security measures.

With Integrity360, organisations can confidently pursue digital acceleration, knowing their security landscape is not just an add-on but a foundational component of their growth, expertly managed to adapt to their evolving needs.

The benefits

Integrity360's 24/7 Managed Service for Fortinet products offers unparalleled benefits, ensuring comprehensive cyber security protection and support:

- **Broad product coverage:** Manages the entire Fortinet Security Fabric, including firewalls (FWs), network devices, threat protection, Secure Access Service Edge (SASE), and Software-Defined Wide Area Network (SDWAN).
- **Expertise and experience:** Leverages over 17 years of consultancy and managed security service expertise with a team of certified security engineers and analysts across four operation centres in Europe.
- **24/7 monitoring** for platform availability and performance issue identification.
- **24/7 incident management** with response and resolution Service Level Agreements (SLAs).
- **24/7 remote Security Operations Centre (SOC)** and Service Desk support.
- **Compliance with standards:** Service requests and change management processes aligned to ITIL/ISO20000.
- **Maintenance and upgrades:** Includes system upgrades and patching for appliances under management.

- **Configuration assessment:** Assesses configurations of in-scope products to ensure adherence to industry best practices and vendor recommendations.
- **Enhanced visibility:** Provides tailored dashboards for full visibility of priority events and activities, offering actionable insights.
- **Custom reporting:** Delivery of periodic custom reports to support informed decision-making.
- **Integration support:** Offers ongoing support for integrations with third-party solutions, including identity providers, SIEM, business SaaS applications, endpoint management platforms, and the wider network environments.
- **Service delivery management:** Includes a service delivery management function with periodic service reviews to ensure alignment with client needs.
- **Comprehensive management** of the entire Fortinet stack.
- A **large team of certified** technical experts with a significant number of NSE certificates, showcasing a commitment to excellence and expertise in cyber security.

Why Integrity360?

At Integrity360, we understand that cyber security is not something to be taken lightly. We have built our reputation on providing the best vulnerability assessment service in the industry, and here are just a few reasons why you should choose us:

- **Highly certified team:** All main certs: Our team includes highly certified professionals with all the main industry certifications. You can be confident that our team has the knowledge and expertise to provide the most comprehensive vulnerability assessments.
- **320 dedicated cyber security professionals:** Our team includes over 320 cyber security professionals, each with a unique set of skills and expertise. This diversity allows us to provide a comprehensive assessment of your environment, identifying vulnerabilities that other providers may miss.
- **Best reporting in the industry:** We pride ourselves on providing the best reporting in the industry. Our reports are highly detailed, easy to understand, and provide clear recommendations for each issue identified.
- **Highly adaptive to customer needs:** We understand that every environment is unique, and we work with our customers to provide assessments that are tailored to their specific needs. We take the time to understand your environment and provide a customised assessment that is most relevant to your business.
- **Only sends experts, not rookies:** At Integrity360, we never send rookies to do a professional's job. Our team is made up of highly experienced professionals who are experts in their field. We believe in quality over quantity and guarantee that you will only receive the highest quality service.
- **We're the best – You get what you pay for:** When it comes to cyber security, you get what you pay for. We believe that our service is the best in the industry and are confident that you will be satisfied with the results. While we may not be the cheapest option, we believe that our service is worth every penny.

Don't take chances with your cyber security. Contact Integrity360 today to schedule a vulnerability assessment and experience the best in the business.
