# FortiDLP Managed Service

Integrity360's FortiDLP Managed Service innovatively addresses Insider Risk Management (IRM) and Data Loss Prevention (DLP) through a cloud-managed, lightweight endpoint agent. Offering immediate risk reduction with out-of-the-box policies, it's fully managed by Integrity360 SOC, effectively tackling various customer challenges.

***60% of data breaches are caused by insider threats.***

## Why do you need it?

The service tackles endpoint data leakage threats especially for remote workforce (offline and off-network) across email, network, messaging apps, online storage, SaaS, and more. It overcomes the complexity of legacy DLP solutions, provides user training at point-of-risk, protects your organisation against insider threats, and ensures compliance with data regulations.

## The benefits:
