

Project Management Office as a Service

Service Definition

January 2026

Finyx provides a scalable, outcomes-focused PMO service, accelerating delivery and improving control. We providing our client with access to expertise, ready-to-use artefacts and best practices backed by industry standards and qualifications. We are committed to running a high performing PMO, whilst ensuring continuous improvement, for sustainable, long-term maturity.

— ABOUT FINYX

small enough to CARE.

**Big
enough**
to depend on.

Finyx are an experienced and trusted Digital Delivery partner there to help you realise your digital ambitions and deliver meaningful change.

We are a wholly independent advisory business singularly focused on solving actual client problems and delivering positive outcomes.

Our only loyalty is to our clients and we pride ourselves on our collaborative partnering approach and our flexible nature; always expecting to deliver more than that stated in the contract.

All of our leaders have held line roles in Blue Chip corporates or large Public Sector organisations, giving us unique insight as to what “good delivery” feels like from a client’s perspective.

Finyx provide genuine expertise through a unique mix of consulting pedigree and industry experience to give our clients the best chance of success.

3

offices

With offices in London, York, and Belfast, we’re perfectly positioned to support clients across the UK.

20

years

We’re proud to have been a part of some of the largest transformation programmes in the UK over the last 20 years.

100+

professionals

THE SERVICE.

PMO has a fundamental role to play in ensuring programmes are set up for success, but it is a function that is frequently overlooked or deemed a simple support service.

The traditional PMO model can be plagued by a lack of integrated programme planning, inconsistent programme reporting, poor dependency ownership, slow onboarding and high overhead costs with poor transparency. This all leads to a programme that overruns its budget, timeline and fails to deliver its organisational value.

Our PMO specialists have experience across public, private and financial sectors, leveraging various toolsets & in-house accelerators, such as M365 & PowerBI, to encourage efficiency, collaboration and transparency.

We provide a cost effective, flexible and scalable solution, providing our client with access to expertise, ready-to-use artefacts and best practices. We are not only committed to running a high performing PMO, but also to ensure we promote continuous improvement, setting our clients up for future success.

THE APPROACH.

Our PMOaaS combines proven processes with proprietary accelerators to deliver consistent, high-quality programme oversight. Our service:

- Maintains strategic alignment to organisational goals and prioritises initiatives that deliver most value,
- Provides standardised processes, tooling and governance structures to promote consistency and compliance across projects and programmes,
- Tracks project performance through key metrics and reporting, ensuring projects remain on track and deliver desired outcomes.

THE VALUE.

Partnering with us through PMOaaS will:

- Increase consistency and accuracy of programme reporting.
- Improve risk, issue and dependency management to avoid delays.
- Enhance resource and budget control, keeping delivery on-track.
- Strengthen governance and planning, enabling quicker decisions.
- Build internal capability, maturing your PMO for long-term success.

ANNEX.

- Key Features
- Key Benefits

Key **FEATURES.**

- 01 Seamless project governance, effective risk management & mitigation.
- 02 Proactive resource management, effectively onboarding new resources to reliably deliver.
- 03 Budget forecasting to ensure delivery on or within agreed budgets.
- 04 Managing risks and issues, implementing timely mitigations and escalations.
- 05 End-to-end benefit tracking, quantifying expected benefits from programme delivery.
- 06 Supplier management, optimising vendor and supplier delivery agreements.
- 07 Integrating existing programmes and methodologies, in a multi-supplier environment.
- 08 Continuous Confidence Measurement to predict risks early and maintain certainty.

Key **BENEFITS.**

- 01 On-demand scalability, guiding at any stage of the project.
- 02 Transparent progress reports and continuous engagement, keeping our progress accountable.
- 03 Continuous improvement, maturing your PMO into a self-sufficient function.
- 04 Seamless transition, tracking activities to ensure readiness for go-live.
- 05 Increased consistency and accuracy throughout programme reporting to facilitate informed decisions.
- 06 Develop and enforce proper standards across the programme which leads to improved project management across the board.
- 07 Enhanced communication across distributed teams.
- 08 Ensuring skills and knowledge are retained in the programme.
