

Portfolio, Programme & Project Management

Service Definition

November 2025

Finyx's Portfolio, Programme & Project Management (PPPM) service provides your organisation with a comprehensive, end-to-end capability for shaping, governing, and delivering technology-enabled change.

At its core, this service ensures that all change investments are strategically aligned, well-controlled, and executed in a way that maximises business value and delivery certainty.

— ABOUT FINYX

small enough to CARE.

**Big
enough**
to depend on.

Finyx are an experienced and trusted Digital Delivery partner there to help you realise your digital ambitions and deliver meaningful change.

We are a wholly independent advisory business singularly focused on solving actual client problems and delivering positive outcomes.

Our only loyalty is to our clients and we pride ourselves on our collaborative partnering approach and our flexible nature; always expecting to deliver more than that stated in the contract.

All of our leaders have held line roles in Blue Chip corporates or large Public Sector organisations, giving us unique insight as to what “good delivery” feels like from a client’s perspective.

Finyx provide genuine expertise through a unique mix of consulting pedigree and industry experience to give our clients the best chance of success.

3

offices

With offices in London, York, and Belfast, we’re perfectly positioned to support clients across the UK.

20

years

We’re proud to have been a part of some of the largest transformation programmes in the UK over the last 20 years.

100+

professionals

Our expanding team of over 100 professionals offers a diverse range of expertise and skills to apply to any challenge.

OUR SERVICES.

STRATEGY

Plan. Transform. Succeed.

Developing digital strategies to drive efficiencies, optimise business growth and provide innovative services to your end users.

DELIVERY

Analysis. Insight. Impact.

Full lifecycle support for your digital transformation programmes, from PMO, to Product Management and Business Change.

COMMERCIAL

Design. Procure. Manage.

Designing digital supply-chains, tendering, negotiating, tracking supplier performance and managing supplier transitions.

BUSINESS MANGEMENT

Visibility. Accountability. Results.

Bringing together a number of related disciplines to improve visibility, efficiency and cost-effectiveness of your digital programmes.

OUR INDUSTRIES.

Finyx operate across a range of industries and our clients are strategically vital for the UK economy and the delivery of our public services.

We support our secure clients by providing specialist teams that understand the sensitivities associated with highly regulated environments, with all of our employees holding clearances at SC level or above.

We operate at all levels of Government from Local Authorities to big Central Departments; offering our Services through a growing number of frameworks.

In the Private Sector, we have an extensive track record supporting global banks, asset and wealth management companies alongside insurance and payment providers.

THE SERVICE.

Organisations are under increasing pressure to deliver change in rapidly changing markets. PMO has a fundamental role to play in ensuring programmes are set up for success, but it is a function that is frequently overlooked or deemed a simple support service. In our experience, this has led to programmes that regularly and needlessly fail, going over-budget, overrunning or failing to meet organisational objectives.

Our service helps your organisation plan, govern, and execute change with clarity and confidence. We align the portfolio of work to strategic priorities, introduce effective prioritisation and governance frameworks, and ensure communication between all parties, including leadership. We strengthen programme and project delivery by establishing consistent ways of working, creating strong business cases, and embedding robust control structures so teams stay focused on defined outcomes.

We provide a cost effective, flexible and scalable solution, providing our client with access to expertise, ready-to-use artefacts and best practices across the core PMO practices. Our PMO specialists have experience in operating within and leading PMO functions across various sectors, leveraging various toolsets, to encourage efficiency, collaboration and transparency e.g. M365, PowerBI.

THE APPROACH.

Using tools to standardise data capture and reporting, we have developed a library of accelerators including Agile Delivery Toolkits and Risk Management Frameworks. These accelerators increase speed-to-delivery, and identify systemic issues, dependencies, and delivery risks early on. We also provide Continuous Confidence Measurement, to assess stakeholder confidence across key delivery criteria to predict issues earlier, and to ensure continuous improvement for the future.

THE VALUE.

We standardise data inputs and use Power Automate to collate returns with automated emails, feeding a governed model into a live Power BI dashboard – creating a single source of truth that saves countless PMO hours per month and enables faster, better-informed decisions with real live data.

We provide a cost effective, flexible and scalable solution, providing our client with access to expertise, ready-to-use artefacts and best practices across the core PMO practices. What sets us apart is not only our ability to run a high performing PMO, but also our commitment to continuous improvement, enabling sustainable long-term change.

ANNEX.

- Key Features
- Key Benefits

Key **FEATURES.**

- 01 End-to-end portfolio, programme and project delivery capability.
- 02 Alignment of change investments to business strategy and priorities.
- 03 Portfolio Office governance and enterprise-wide delivery control.
- 04 Robust methodologies: PMI, MSP, PRINCE2 and Agile-based frameworks.
- 05 Clear scope, outcomes, benefits and baselined delivery plans.
- 06 Structured communications ensuring timely, accurate stakeholder engagement.
- 07 Health-checks and Continuous Confidence Measurement to predict delivery issues.
- 08 Comprehensive library of accelerators and toolkits for rapid mobilisation.
- 09 Expert delivery across regulated public- and private-sector environments.
- 10 Flexible engagement across any stage of the delivery lifecycle.

Key **BENEFITS.**

- 01 Improved delivery certainty across complex portfolios and programmes.
- 02 Clearer strategic alignment between change activity and business priorities.
- 03 Faster mobilisation using proven frameworks and accelerators.
- 04 Early identification of blockers through structured health-checks.
- 05 Reduced risk through experienced programme and project leadership.
- 06 Better decision-making via high-quality, consistent delivery data.
- 07 Improved stakeholder engagement and confidence in delivery outcomes.
- 08 Enhanced governance supporting successful regulatory and audit requirements.
- 09 Greater operational readiness through structured transition and integration methods.
- 10 Stronger supplier and client partnerships enabling sustained success.
