

End-to-End Digital Delivery

Digital Project Delivery

Technology change is a constant for our clients. We bring deep domain expertise across a wide range of industries, with teams experienced in delivering complex technology and infrastructure projects in the most demanding environments.

We harness the collective experience of our people to provide every client with clear advice, confidence, and certainty on their most critical transformation journeys.

— ABOUT FINYX

small enough to CARE.

**Big
enough**
to depend on.

Finyx are an experienced and trusted Digital Delivery partner there to help you realise your digital ambitions and deliver meaningful change.

We are a wholly independent advisory business singularly focused on solving actual client problems and delivering positive outcomes.

Our only loyalty is to our clients and we pride ourselves on our collaborative partnering approach and our flexible nature; always expecting to deliver more than that stated in the contract.

All of our leaders have held line roles in Blue Chip corporates or large Public Sector organisations, giving us unique insight as to what “good delivery” feels like from a client’s perspective.

Finyx provide genuine expertise through a unique mix of consulting pedigree and industry experience to give our clients the best chance of success.

3

offices

With offices in London, York, and Belfast, we’re perfectly positioned to support clients across the UK.

20

years

We’re proud to have been a part of some of the largest transformation programmes in the UK over the last 20 years.

100+

professionals

Our expanding team of over 100 professionals offers a diverse range of expertise and skills to apply to any challenge.

OUR SERVICES.

STRATEGY

Plan. Transform. Succeed.

Developing digital strategies to drive efficiencies, optimise business growth and provide innovative services to your end users.

DELIVERY

Analysis. Insight. Impact.

Full lifecycle support for your digital transformation programmes, from PMO, to Product Management and Business Change.

COMMERCIAL

Design. Procure. Manage.

Designing digital supply-chains, tendering, negotiating, tracking supplier performance and managing supplier transitions.

BUSINESS MANGEMENT

Visibility. Accountability. Results.

Bringing together a number of related disciplines to improve visibility, efficiency and cost-effectiveness of your digital programmes.

OUR INDUSTRIES.

Finyx operate across a range of industries and our clients are strategically vital for the UK economy and the delivery of our public services.

We support our secure clients by providing specialist teams that understand the sensitivities associated with highly regulated environments, with all of our employees holding clearances at SC level or above.

We operate at all levels of Government from Local Authorities to big Central Departments; offering our Services through a growing number of frameworks.

In the Private Sector, we have an extensive track record supporting global banks, asset and wealth management companies alongside insurance and payment providers.

THE SERVICE.

As organisations pivot to digital-first models, the primary barrier to success is rarely a lack of vision, but rather the "execution gap". Infrastructure and technology transformations are notoriously complex, often stalling due to misaligned stakeholders, rigid legacy processes, or a lack of specialised oversight.

Our Digital Project Delivery service provides the expert steering required to navigate these high-stakes environments, ensuring that your technical investments translate into tangible operational reality without disrupting the core business.

We take end-to-end accountability for the delivery lifecycle, orchestrating large-scale infrastructure migrations and complex technology overhauls with precision. Moving beyond mere task management, we prioritise strategic alignment and proactive risk mitigation to ensure every milestone secures technical stability and measurable ROI. By embedding our seasoned delivery leads into your team, we dismantle silos, enforce transparent governance, and significantly accelerate delivery timelines on time, under budget and built to scale.

THE APPROACH.

Our service is designed to provide end-to-end coverage of digital project delivery, from understanding current capabilities to defining future objectives and delivering sustainable change. It ensures that new solutions are thoughtfully designed, rigorously tested, and operationally ready.

Execution is paired with informative capability and knowledge transfer and ensuring adoption across the organisation. Assurance and evolution will drive resilience, learning, and fostering an environment of continuous improvement, creating a framework that delivers both impact and lasting value.

THE VALUE.

This robust digital project delivery model equips our consultants with the foundation they need to support clients in driving successful digital transformations by:

- Delivering changes that are adopted seamlessly.
- Ensuring solutions are tested, reliable, resilient, and fit for purpose.
- Driving projects that achieve real, measurable outcomes.
- Transferring knowledge and skills effectively to end users.
- Embedding continuous learning to improve future projects and services.

SUCCESS STORIES.

London Stock Exchange Group (LSEG)

Financial Services

Finyx delivered a controlled migration of 18,000 developers from three legacy, on-premise virtual desktops that were running on end-of-life hardware to LSEG's cloud-hosted Windows 365 environment.

The outcome was a streamlined End User Computing (EUC) estate achieved by decommissioning costly legacy environments. This migration reduced technical risk, improved access resilience, and provided the robust infrastructure necessary to support the client's future growth.

Large Central Crime Agency

Public Sector

Finyx delivered a large-scale Windows 11 upgrade for c.7,500 devices, replacing an outdated estate at imminent end-of-support risk. Finyx developed a secure, modern Windows 11 build, consolidated a fragmented application portfolio, and introduced a clear process for upgrading and testing apps.

The outcome was a resilient, future-ready end user environment that improved efficiency, security, and scalability across the organisation.

Kantar

Market Research & Data Analytics

Finyx established a new Service Management and Integration capability for a key global data and insights consultancy, including processes, tooling, and third-party infrastructure contracts, to ensure continuity of service for existing teams and business operations.

The outcome was a seamless transition from the TSA, with resilient service delivery, clear ownership, and a platform for ongoing IT service excellence.

YOUR DIGITAL TRANSFORMATION PARTNER.

I bring a strategic mindset with a calm, delivery-focused approach to helping clients execute large-scale digital change. With over eight years' experience delivering core infrastructure modernisation, I specialise in enabling technology transformation while maintaining operational stability and business confidence. My focus is on helping organisations unlock their future through scalable, secure, and cost-optimised platforms.

Brad Hill

Digital Project Delivery Lead
