

EMPOWERING A DIGITAL WORKFORCE

Skills & Resources

With Fynyx you can confidently navigate the complexities of digital transformation, ensuring that your organisation is equipped with the tools and capabilities needed to thrive in the digital era.

Partner with us to future-proof your workforce and maximise the return on your technology investments.

— ABOUT FINYX

small enough to CARE.

**Big
enough**
to depend on.

Finyx are an experienced and trusted Digital Delivery partner there to help you realise your digital ambitions and deliver meaningful change.

We are a wholly independent advisory business singularly focused on solving actual client problems and delivering positive outcomes

Our only loyalty is to our clients and we pride ourselves on our collaborative partnering approach and our flexible nature; always expecting to deliver more than that stated in the contract.

All of our leaders have held line roles in Blue Chip corporates or large Public Sector organisations, giving us unique insight as to what “good delivery” feels like from a client’s perspective.

Finyx provide genuine expertise through a unique mix of consulting pedigree and industry experience to give our clients the best chance of success.

3

offices

With offices in London, York, and Belfast, we’re perfectly positioned to support clients across the UK.

20

years

We’re proud to have been a part of some of the largest transformation programmes in the UK over the last 20 years.

100+

professionals

Our expanding team of over 100 professionals offers a diverse range of expertise and skills to apply to any challenge.

OUR SERVICES.

STRATEGY

Plan. Transform. Succeed.

Developing digital strategies to drive efficiencies, optimise business growth and provide innovative services to your end users.

DELIVERY

Analysis. Insight. Impact.

Full lifecycle support for your digital transformation programmes, from PMO, to Product Management and Business Change.

COMMERCIAL

Design. Procure. Manage.

Designing digital supply-chains, tendering, negotiating, tracking supplier performance and managing supplier transitions.

BUSINESS MANGEMENT

Visibility. Accountability. Results.

Bringing together a number of related disciplines to improve visibility, efficiency and cost-effectiveness of your digital programmes.

OUR INDUSTRIES.

Finyx operate across a range of industries and our clients are strategically vital for the UK economy and the delivery of our public services.

We support our secure clients by providing specialist teams that understand the sensitivities associated with highly regulated environments, with all of our employees holding clearances at SC level or above.

We operate at all levels of Government from Local Authorities to big Central Departments; offering our Services through a growing number of frameworks.

In the Private Sector, we have an extensive track record supporting global banks, asset and wealth management companies alongside insurance and payment providers.

THE SERVICE.

Technology alone is not a silver bullet. Investing in your workforce to cultivate digital skills and foster a digital-first culture among colleagues and leadership is paramount to unlocking the full potential of these advancements.

Fynx can help you unlock productivity and efficiency through several services which enable you to effectively measure, upskill and build a digitally engaged workforce and client base.

Workforce Digital Skills Assessment - Gain a clear understanding of the current digital skills profile across the workforce.

Digital skills mapping and gap analysis - To demonstrate the digital skills required to create a digital first culture.

Targeted upskilling and re-skilling strategies - Highlight key skills deficiencies and identify necessary upskilling initiatives to support streamlined and automated processes

KPI development and progress measurement - Establish benchmarks and outcomes to ensure continuous improvement and alignment with organizational goals

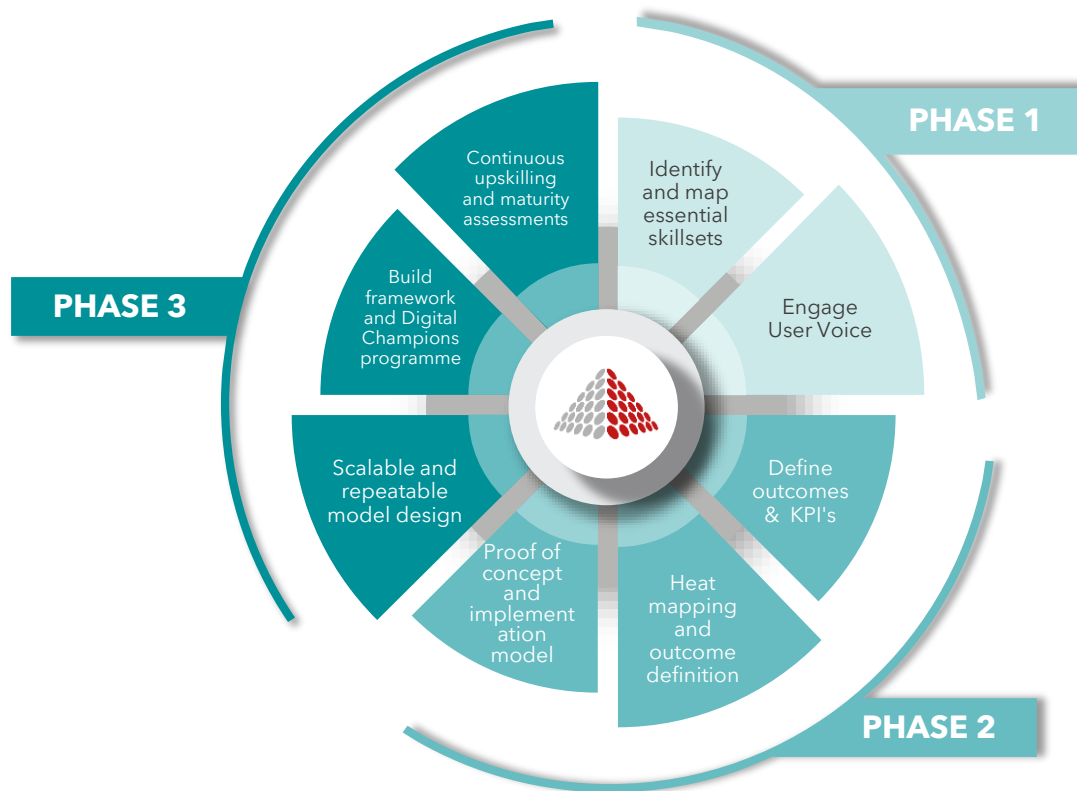

Workforce technology alignment. Demonstrate the potential efficiency and productivity benefits of aligning workforce skillsets with new technologies and processes

Scalable and repeatable improvement models. Design a scalable and repeatable model for continuous improvement of digital skills and workforce technology adoption

THE APPROACH.

Our service is designed to provide a holistic understanding of your workforce's current digital skills profile, enabling us to:

- Identify and map the essential skillsets required to support a digitally enabled workforce.
- Highlight key skills deficiencies and recommend targeted upskilling initiatives to streamline processes, enhance automation and drive productivity and efficiencies.

THE VALUE.

By aligning workforce capabilities with emerging technologies and processes, we will:

- Define Key Performance Indicators (KPIs) to measure progress.
- Demonstrate clear efficiency and productivity gains across your workforce.
- Develop a scalable and repeatable model for continuous improvement in digital skills and technology adoption.

YOUR DIGITAL TRANSFORMATION PARTNER.

I bring a wealth of experience, capability, and genuine passion to help organisations strategically invest in their workforce's digital skills. My aim is to empower businesses to unlock measurable improvements in productivity, efficiency, and user experience. By focusing on targeted skill development, I enable teams to adapt to the evolving digital landscape, ensuring sustainable growth and a competitive edge.
