- ✓ Differs from internal/ external audits; its holistic across the estate

## OVERVIEW

Finyx's Cyber Maturity Assessment helps you understand how effectively cyber risk is managed through existing security controls. It is an objective review of the current posture, presented in the context of recognisable frameworks and metrics, enabling both board members and security professionals to make informed decisions to improve security maturity.

## SERVICE OVERVIEW

This is a full review of the information security maturity for an organisation as defined by the organisation's cyber security framework, or if one is not adopted then an industry framework will be used. Our review covers people, processes and technology and effectiveness and scoring is applied using the industry CMMI method.

This service is effective at all stages of your cyber security maturity journey. It can provide an initial maturity programme definition for organisations that are at the start of their journey and provides a very effective external assessment of progress where organisations are undergoing a Security Improvement Programme to validate that expected improvements have been delivered.

## CHARGING MODEL

Finyx are offering Fixed price engagement for this service, which will depend on the size of the organisation, complexity of the IT landscape and the maturity of the current controls environment.

## ABOUT US

### INSIGHT

Through many years of developing solutions for our clients we know "what good feels like" and we have the insight to assist them in getting there.

### EXPERIENCE

Finyx has a broad range of capabilities and can assist with all aspects of IT Transformation; from defining the strategy and roadmap, through describing and procuring required solutions, to providing a project office and overseeing service migrations.

### EXECUTION

Finyx are active in both the Public and Private sectors; we have a history of building long-standing client relationships and returning to support them on further engagements.
