Redcentric Cloud

Redcentric Cloud is a cloud solution designed to provide a versatile and cost-effective option for Public Sector customers. Delivering virtualised server, storage and network infrastructure using an opex-based consumption model. The platforms are managed by Redcentric covering performance, capacity, patching, installation, upgrades for data marked "official"

Redcentric Cloud is compatible with Managed Server as a Service also available from G-Cloud.

We want to ensure that we can provide maximum flexibility when it comes to configuration, rather than provide fixed size servers we can work with you to ensure the servers are sized to your specific requirements.

To meet those needs we bill by resource use:

- vCPU - including contended, un-contended, and DR reservation
- Memory - included un-contended and DR reservation.
- Storage
- Disaster Recovery Protection, with optional Managed Disaster Recovery
- Managed Operating System
- Operating System Licensing (where provided by Redcentric)

Pricing

All prices exclude VAT.

This Service is subject to Call-Off Contract Period of 36 months and a Minimum Period of Service of 12 months with a month minimum committed spend of £1,500.00.

Discounts

Redcentric Solutions Ltd Lot 1 Framework Discount is 21% and this will be applied to the prices set out in this Price Card.

Redcentric Cloud

IaaS is an entirely usage-based service; at the end of each calendar month Redcentric extract usage data and then multiply each consumed unit by the applicable charge in the pricing tables below.

Customers can opt for a managed Virtual Data Centre (VDC), a self-service VDC, or a combination of both; Managed OS charges apply to every Virtual Machine residing in a managed VDC. Managed and Self-Service VDCs can be connected, in this case managed OS boundary ends is the hand-off to the self-service VDC. The underlying platform is entirely managed by Redcentric.

Operating System software licensing charges applied to every virtual machine running Windows or Red Hat Enterprise Linux in both managed and self-service VDCs.

MS-SQL licensing is extracted through Redcentric software asset management system and then charged as used by customers.

If the customer requires multi-site DR this cost is based on the number of source VM's being protected and the vCPU, vRAM and storage used.

Additional charges apply if a customer opts to take a managed service with Managed DR. Complex DR testing and migration projects will be scoped and priced using the Supplier Rate Card
