

Architecture Maturity Assessment

Introduction

Effective **architecture and design** are critical to the successful delivery of **business change**, **cloud adoption** and **digital transformation** across the public sector. Mosaic Island provides a suite of **design-led consulting services** that support public sector organisations in planning, shaping and delivering complex change in a controlled, proportionate and outcome-focused manner.

Our services support organisations across the full change lifecycle, from **strategy and enterprise architecture** through **enterprise solution architecture**, **solution architecture** and **data architecture**, to **delivery management**, **assurance** and **recovery**. We help ensure that architectural decisions, delivery governance and operating models are aligned to organisational objectives, statutory obligations and service outcomes.

Our approach is collaborative, pragmatic and flexible. We work *with you, not to you*, tailoring our services to organisational context, maturity and delivery environment. Services can be engaged individually or combined to provide end-to-end support across **cloud migration**, **digital service delivery**, **business change** and **large-scale technology programmes**.

Our services are grounded in extensive real-world experience across the private and public sectors, and across a range of delivery models including **agile**, **waterfall** and **hybrid**. We adapt our approach to support effective governance, assurance and value for money, helping organisations manage risk while delivering sustainable change.

Our focus is on practical delivery. We support informed decision-making, reduce delivery risk and help organisations design and deliver solutions that are fit for purpose, secure and capable of evolving over time.

Service Overview

Mosaic Island's **Architecture Maturity Assessment** service helps organisations understand the current maturity of their **enterprise architecture capability** and identify practical steps to improve it. The service provides a clear baseline to support **cloud transformation**, **digital change** and large-scale **technology programmes**.

The assessment evaluates architecture capability across **business and technology viewpoints**, identifying strengths, gaps and risks. It provides actionable recommendations aligned to organisational context, ambition and delivery capability.

This service is particularly valuable for organisations preparing for **cloud adoption**, scaling digital delivery, or seeking to improve governance and consistency across programmes and projects.

Mosaic Island

Our Approach

Our approach is structured, pragmatic and collaborative. We work *with you, not to you*, engaging architecture, delivery and leadership stakeholders to understand how enterprise architecture operates in practice.

The assessment uses **TOGAF®** as a qualitative reference model to evaluate current maturity, define an appropriate **target maturity level**, and identify the steps required to evolve capability over time. Recommendations are proportionate and tailored to organisational size, complexity and delivery maturity.

The outcome is a clear, realistic improvement plan rather than a theoretical maturity score.

Strategic Focus Areas

The Architecture Maturity Assessment service typically focuses on:

- **Enterprise architecture capability and maturity**
- **Alignment of architecture to business strategy**
- **Support for cloud and digital transformation**
- **Architecture governance and decision-making**
- **Consistency across programmes and projects**
- **Readiness for large-scale change delivery**

These focus areas ensure architecture capability supports both **strategic intent** and **delivery execution**.

Service Features

The Architecture Maturity Assessment service may include:

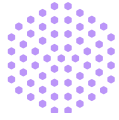

- Assessment using an **enterprise architecture maturity model**
- Review of current architecture practices and artefacts
- **Reference architecture gap assessment**
- Identification of an appropriate **target maturity level**
- Development of an **actionable maturity improvement plan**
- Prioritised recommendations aligned to organisational context

Scope and depth are agreed per engagement.

Service Benefits

This service enables organisations to:

- **Reduce delivery risk** across programmes and projects

Mosaic Island

- Improve alignment between **strategy, architecture** and **delivery**
- Establish clear, visible targets for architecture capability improvement
- Focus investment on the most **valuable maturity improvements**
- **Increase confidence** in cloud and digital transformation readiness

Typical Outcomes

- A **clear understanding** of current enterprise architecture maturity
- **Identified gaps, risks** and **improvement** opportunities
- A **realistic target** maturity aligned to organisational needs
- A **practical roadmap** for evolving architecture capability
- **Improved confidence** in supporting cloud and digital change

Why Mosaic Island

Mosaic Island is **independent, technology-agnostic** and experienced in assessing and evolving enterprise architecture capabilities in complex environments. We focus on practical, achievable improvements that support real delivery outcomes.
