

Scrumconnect Service description

Data Recovery, Conversion and Migration

**At Scrumconnect, we deliver
user-centric digital solutions
that transform public services.**

**Our team of expert consultants
excels in full lifecycle
development, turning complex
challenges into actionable
results that drive real impact.**

Our mission is to make digital services and products easy to use for our clients and their customers, creating great user experiences for everyone.

What we do

Our Data Recovery, Conversion, and Migration service offers a comprehensive solution tailored for businesses needing to safeguard, transform, and enhance their data infrastructure. We specialize in recovering critical data from various failure scenarios, converting data formats to optimize accessibility and performance, and seamlessly migrating data across different platforms. This service is designed to minimize downtime, ensure data integrity, and facilitate the efficient transition of data assets. By employing state-of-the-art tools and methodologies, we handle everything from simple data transfers to complex recovery tasks, ensuring your data is not only secure but also primed for future technologies and challenges

Service Features

Scalability and Flexibility: Our service on Microsoft Azure Cloud effortlessly scales to accommodate the increasing demands of data volume and velocity, allowing businesses to expand without the constraints of traditional infrastructure.

Enhanced Decision Making: By leveraging cutting-edge analytics and machine learning models, our service transforms complex datasets into clear, actionable insights.

Cost Efficiency: Utilizing Azure's scalable cloud infrastructure, our service reduces the overhead costs typically associated with managing large data volumes. The pay-as-you-go pricing model ensures that businesses only pay for the resources they use, which minimizes wasted expenditures and aligns costs directly with growth.

Security and Compliance: With Azure's comprehensive security features, our data engineering service ensures the highest level of data protection. This includes advanced encryption methods, rigorous access controls, and continuous compliance monitoring, safeguarding sensitive information against unauthorized access and breaches while complying with international regulatory standards.

Operational Efficiency: Our service streamlines data management tasks through automation of routine processes such as ETL (Extraction, Transformation, and Loading), allowing staff to focus on higher-value activities. This increases the overall productivity and efficiency of teams by reducing manual errors and freeing up resources for more strategic initiatives that drive business growth

What we do

Service Benefits:

Reduced Risk of Data Loss: Utilizes proven recovery methods to significantly reduce the risk of data loss, safeguarding your critical information assets.

Enhanced Data Usability: Through effective conversion practices, data is made more accessible and useful for business operations, enabling better data-driven decision-making.

Operational Continuity: Ensures minimal disruption during critical data processes, maintaining business operations and reducing potential financial losses.

Future-Proof Data Infrastructure: Prepares your data environment for future technological advancements, ensuring compatibility and scalability.

Compliance and Security: Meets strict compliance standards for data handling, providing peace of mind through enhanced security measures.

Service Delivery:

Thorough Planning and Analysis: Begins with a detailed analysis of the existing data infrastructure to plan precise recovery, conversion, and migration strategies.

Customized Service Execution: Tailors each process to the client's specific needs, utilizing the best tools and practices for optimal outcomes.

Minimized Operational Impact: Implements all services with an emphasis on reducing downtime and operational impact, ensuring business processes continue smoothly.

Security and Compliance Adherence: Maintains strict adherence to security protocols and compliance security protocols and compliance requirements, safeguarding data throughout all procedures.

Ongoing Support and Maintenance: Offers continuous support and maintenance post-delivery to address any subsequent needs or adjustments, enhancing long-term data resilience.

DATA PARTNERS

We work alongside you to harness the full potential of your data ensuring it drives meaningful outcomes and business success.

Data Engineering

Data Operations

Data Science and AI

Data Analytics and Insights

DESIGN PARTNERS

We understand the unique challenges you face in delivering exceptional design and research. We've been there and done it and delivered positive impact.

Service Design

Interaction / UX Design

Digital strategy

Why us?

Track record

Experienced delivery partner for private and public sector clients.

UK Govt trusted partner

We've been working in the UK Public Sector for 10 years.

Cross-sector delivery experience

DWP, MoJ, HMPO, DfE, GDS, SITA, Cora, Bank of England and ASOS.

Value for money

Clear vision for improvement, TCO benefits, competitive rates & experienced team.

Hand picked team

10+ years experience of picking bespoke digital teams to meet customer demands.

Delivery mindset

Delivered 40+ projects over Discovery, Alpha, Beta and Live.

Quality

Meeting user needs as default.

Standards

Adherence to GDS and Industry SDLC and Designs, tech community participation. Certified to Cyber Essentials Plus, ISO 9001/27001.

**Delivering over 20% of
the top 75 UK
citizen-facing public
services and a number
of private sector
customer facing
programmes.**

68 user-centred digital
services across 14
major clients.

350 people currently
deployed on client
projects.

50m UK citizens user
our solutions.

Our Digital Transformation for the UK Public Sector

Transforming pension experiences at the Department for Work and Pensions

Scrumconnect transformed pension experiences with our award-winning Get Your State Pension service for DWP. Serving 12 million UK citizens, we achieved an 80% digital adoption rate and over 95% satisfaction, managing £101 billion annually. Welcome to the new era of pension management.

Building the Ministry of Justice exemplar service

Scrumconnect pioneered one of the Ministry of Justice's earliest exemplar services, spearheading the adoption of a cloud-first approach and modernizing their organizational structure. Based in Manchester magistrates' court, our team developed a product aimed at minimizing unnecessary visits, driving efficiency and effectiveness.

Digital Transformation of HM Prison and Probation Service

Scrumconnect consultants are at the forefront of addressing major challenges within prisons and probation systems. With issues spanning across the board, timely access to pertinent data can be lifesaving for prison officers. Our consultants are dedicated to developing cutting-edge products and services tailored for a modern prison system, ensuring efficiency and effectiveness at every step.

Our Digital Transformation for the Private Sector

Expanding capacity and capabilities with speed at Cora

Cora aimed to expand its IT capacity for delivering more features to customers efficiently. Scrumconnect assembled a team of 30 FTEs, enabling experienced staff to focus on client engagement, yielding a 10x return on investment. Let's explore further opportunities to deepen our partnership.

eCommerce programme for international airline

We managed the development of three distinct E-Commerce solutions for a global airline undergoing extensive integration. Our responsibilities included overseeing site development, maintaining release schedules, sprint and release planning, and complete stakeholder management. We provided thorough reporting on deliverables and outcomes throughout the process.

Revolutionising the Bank of England's Cloud Migration: From Days to Minutes

In a groundbreaking initiative, Scrumconnect facilitated the seamless transition of the Bank of England to the cloud, slashing analysis time from 20 days to a mere 30 minutes. Our approach, which included secure landing zones, application on-boarding mechanisms, containerization, and extensive training, has not only streamlined operations but also laid the foundation for a resilient, forward-thinking cloud strategy.

We're guided by our values at all times

Collaboration

We believe that we are stronger as a team than as individuals. We create and solve problems together.

Early Value Creation

We find the quickest route from idea to product because that is where our business value is. Customers rely on us to impact their business and we always deliver.

Learning

The future belongs to those that can adapt fast. We do this by continuously learning, sharing and growing as individuals and as teams.

Integrity

Teamwork requires trust with everyone that we work with. We can always be relied upon to behave with the highest standards.

Commitment

No matter what, we always give our 100% to achieving our goals. Our focus and motivation is always the highest.
