What we do

Our Digital by Default Services epitomize a paradigm shift towards seamless digital interactions. We create intuitive, efficient, and secure digital solutions that prioritize user-centric design, accessibility, and continuous improvement, empowering organizations to stay ahead in the digital landscape.

User-Centric Design

Our services prioritize understanding user needs and preferences, ensuring that digital solutions meet expectations.

Multi-Platform Optimization

We optimize digital experiences across various platforms, including websites, apps and engaging interactions across all channels.

Secure Transactions

Our services implement robust security measures, such as encrypting data and securing transactions.

Streamlined Workflows

We streamline automation and process optimization, we streamline digital workflows for users and organizations alike.

Continuous Improvement

Concept an iterative approach to development, regularly gathering feedback and making enhancements with user needs and preferences.

What we do

Service Benefits:

- Enhanced User Experience: Our Digital by Default Services prioritize user-centric design and intuitive interfaces, resulting in seamless and enjoyable digital interactions.
- Improved Accessibility: By optimizing digital platforms for accessibility standards, we ensure that all users, including those with disabilities, can easily access and navigate through our digital services.
- Streamlined Processes: Through automation and process optimization, we streamline workflows, reducing manual effort and enhancing operational efficiency for both users and organizations.
- Enhanced Security: Robust security measures, including encryption, authentication, and compliance with data protection regulations, safeguard user data and privacy, fostering trust and confidence in our digital services.
- Cost Savings: By digitizing processes and reducing manual intervention, our services lead to lower operational costs, maximizing ROI for organizations while delivering superior digital experiences

Service Delivery:

- Discovery Phase: Understand client objectives and user needs.
- Design and Development: Create digital solutions tailored to requirements.
- Testing and Quality Assurance: Rigorous testing to ensure functionality and security.
- Deployment: Seamless integration and launch of digital services.
- Support and Maintenance: Ongoing support for optimal performance and updates.

the top 75 UK
citizen-facing public
services and a number
of private sector
customer facing
programmes.**

68 user-centred digital
services across 14
major clients.

350 people currently
deployed on client
projects.

50m UK citizens user
our solutions.

Our Digital Transformation for the UK Public Sector

Transforming pension experiences at the Department for Work and Pensions

Scrumconnect transformed pension experiences with our award-winning Get Your State Pension service for DWP. Serving 12 million UK citizens, we achieved an 80% digital adoption rate and over 95% satisfaction, managing £101 billion annually. Welcome to the new era of pension management.

Building the Ministry of Justice exemplar service

Scrumconnect pioneered one of the Ministry of Justice's earliest exemplar services, spearheading the adoption of a cloud-first approach and modernizing their organizational structure. Based in Manchester magistrates' court, our team developed a product aimed at minimizing unnecessary visits, driving efficiency and effectiveness.

Digital Transformation of HM Prison and Probation Service

Scrumconnect consultants are at the forefront of addressing major challenges within prisons and probation systems. With issues spanning across the board, timely access to pertinent data can be lifesaving for prison officers. Our consultants are dedicated to developing cutting-edge products and services tailored for a modern prison system, ensuring efficiency and effectiveness at every step.

Our Digital Transformation for the Private Sector

Expanding capacity and capabilities with speed at Cora

Cora aimed to expand its IT capacity for delivering more features to customers efficiently. Scrumconnect assembled a team of 30 FTEs, enabling experienced staff to focus on client engagement, yielding a 10x return on investment. Let's explore further opportunities to deepen our partnership.

eCommerce programme for international airline

We managed the development of three distinct E-Commerce solutions for a global airline undergoing extensive integration. Our responsibilities included overseeing site development, maintaining release schedules, sprint and release planning, and complete stakeholder management. We provided thorough reporting on deliverables and outcomes throughout the process.

Revolutionising the Bank of England's Cloud Migration: From Days to Minutes

In a groundbreaking initiative, Scrumconnect facilitated the seamless transition of the Bank of England to the cloud, slashing analysis time from 20 days to a mere 30 minutes. Our approach, which included secure landing zones, application on-boarding mechanisms, containerization, and extensive training, has not only streamlined operations but also laid the foundation for a resilient, forward-thinking cloud strategy.

We're guided by our values at all times

Collaboration

We believe that we are stronger as a team than as individuals. We create and solve problems together.

Early Value Creation

We find the quickest route from idea to product because that is where our business value is. Customers rely on us to impact their business and we always deliver.

Learning

The future belongs to those that can adapt fast. We do this by continuously learning, sharing and growing as individuals and as teams.

Integrity

Teamwork requires trust with everyone that we work with. We can always be relied upon to behave with the highest standards.

Commitment

No matter what, we always give our 100% to achieving our goals. Our focus and motivation is always the highest.
