

Scrumconnect

Service description

Digital Strategy

**At Scrumconnect, we deliver
user-centric digital solutions
that transform public services.**

**Our team of expert consultants
excels in full lifecycle
development, turning complex
challenges into actionable
results that drive real impact.**

Our mission is to make digital services and products easy to use for our clients and their customers, creating great user experiences for everyone.

What we do

Our Content Design service offering is tailored to create compelling, user-centric content that engages and audiences effectively. This service combines the art of piece of content, from web pages to marketing materials, and crafted for search engines. Utilizing a sophisticated content management system (CMS) system, and distribution processes, enabling seamless updates, and endates and consistent quality and platforms.

We exemplify, that holistic service-based on visibility and performance and trust. This holistic approach not only the visibility and impact's by improving that strategic user impact of engagement and satisfaction.

Service Features:

Strategic Content Creation

Tailored content that aligns with brand identity and user engagement goals.

Advanced CMS Integration

Utilizes sophisticated CMS tools for efficient content management and scalability.

SEO Optimization

Incorporates best SEO practices to enhance content visibility and searchability.

Analytics and Reporting

Provides detailed insights into content performance and user interaction.

Multimedia Content Capabilities

Supports diverse formats including text, video, and interactive media.

What we do

Our Digital Strategy service provides a comprehensive roadmap to transform your organization's digital capabilities, integrating innovative technologies to enhance operational efficiency and customer engagement. We design a tailored strategy, prioritizing cybersecurity and data compliance, to equip your organization for a digital-first future.

Service Features:

Digital Transformation Roadmapping

Develops a strategic plan that outlines key digital initiatives, timelines, and resource allocations to achieve your digital transformation goals effectively.

Technology Integration and Optimization

Identifies and integrates cutting-edge technologies tailored to enhance your business processes and customer interactions, including AI, IoT, and cloud computing.

Market and Competitive Analysis

Conducts thorough market research and competitive analysis to identify digital trends and opportunities, ensuring your strategy capitalizes on current and future market conditions.

Cybersecurity Framework Implementation

Designs and implements robust cybersecurity measures to protect your digital assets and ensure compliance with international data protection regulations.

Change Management and Stakeholder Engagement

Manages the change process across your organization, ensuring all stakeholders are aligned with the digital strategy and fully engaged with its implementation.

Service Benefits:

Strategic Competitive Advantage

Empowers your business to outperform competitors by leveraging advanced digital solutions that enhance operational efficiency and customer value.

Increased Operational Efficiency

Streamlines processes through automation and digital workflows, significantly reducing costs and improving service delivery speed.

Enhanced Data-Driven Decision Making

Utilizes big data and analytics to provide actionable insights, enabling smarter, faster decision-making processes.

Improved Customer Engagement

Creates more meaningful and personalized customer interactions through targeted digital initiatives, boosting satisfaction and loyalty.

Risk Mitigation

Ensures that all digital operations are secure and compliant with the latest data protection standards, minimizing cybersecurity risks.

Service Delivery:

Expert-Led Project Governance

Implements a governance framework led by experienced professionals who ensure all projects meet business and compliance requirements.

Rigorous Design and Compliance Reviews

Performs thorough reviews and audits to certify that designs and processes meet all necessary standards and functional specifications.

Adaptive Risk Management

Integrates dynamic risk management strategies that adapt to project changes and emerging risks, ensuring robust project execution.

Detailed Documentation and Reporting

Provides extensive documentation and clear reporting on governance, risk, and compliance (GRC) activities to support transparency and strategic planning.

Continuous Engagement and Support

Maintains ongoing engagement with project teams to provide continuous support, guidance, and expertise throughout the project lifecycle.

our solutions.

Our Digital Transformation for the UK Public Sector

Transforming pension experiences at the Department for Work and Pensions

Scrumconnect transformed pension experiences with our award-winning Get Your State Pension service for DWP. Serving 12 million UK citizens, we achieved an 80% digital adoption rate and over 95% satisfaction, managing £101 billion annually. Welcome to the new era of pension management.

Building the Ministry of Justice exemplar service

Scrumconnect pioneered one of the Ministry of Justice's earliest exemplar services, spearheading the adoption of a cloud-first approach and modernizing their organizational structure. Based in Manchester magistrates' court, our team developed a product aimed at minimizing unnecessary visits, driving efficiency and effectiveness.

Digital Transformation of HM Prison and Probation Service

Scrumconnect consultants are at the forefront of addressing major challenges within prisons and probation systems. With issues spanning across the board, timely access to pertinent data can be lifesaving for prison officers. Our consultants are dedicated to developing cutting-edge products and services tailored for a modern prison system, ensuring efficiency and effectiveness at every step.

Our Digital Transformation for the Private Sector

Expanding capacity and capabilities with speed at Cora

Cora aimed to expand its IT capacity for delivering more features to customers efficiently. Scrumconnect assembled a team of 30 FTEs, enabling experienced staff to focus on client engagement, yielding a 10x return on investment. Let's explore further opportunities to deepen our partnership.

eCommerce programme for international airline

We managed the development of three distinct E-Commerce solutions for a global airline undergoing extensive integration. Our responsibilities included overseeing site development, maintaining release schedules, sprint and release planning, and complete stakeholder management. We provided thorough reporting on deliverables and outcomes throughout the process.

Revolutionising the Bank of England's Cloud Migration: From Days to Minutes

In a groundbreaking initiative, Scrumconnect facilitated the seamless transition of the Bank of England to the cloud, slashing analysis time from 20 days to a mere 30 minutes. Our approach, which included secure landing zones, application on-boarding mechanisms, containerization, and extensive training, has not only streamlined operations but also laid the foundation for a resilient, forward-thinking cloud strategy.

We're guided by our values at all times

Collaboration

We believe that we are stronger as a team than as individuals. We create and solve problems together.

Early Value Creation

We find the quickest route from idea to product because that is where our business value is. Customers rely on us to impact their business and we always deliver.

Learning

The future belongs to those that can adapt fast. We do this by continuously learning, sharing and growing as individuals and as teams.

Integrity

Teamwork requires trust with everyone that we work with. We can always be relied upon to behave with the highest standards.

Commitment

No matter what, we always give our 100% to achieving our goals. Our focus and motivation is always the highest.
